👤 About

My skills in front-end web development are well established and I am currently improving my capabilities in back-end web development

🛠 Skills

JavaScript	ReactJS	PostgreSQL	Git & Github
TypeScript	NextJS	MongoDB	Docker
Python	Tailwindcss	Firestore	Nginx

🗂 Projects

Linkshr

Designed and implemented a web app to help you share your links with your group in groups. This is so that anyone can open your links in the chain you are viewing them in. It has a very user-friendly UI and easy to use features. It uses SSR for dynamic routes to make changes to links appear seamless.

Stack: NextJs, ReactJs, MongoDB, mongoose, Pullstate, Tailwindcss

Github: https://github.com/Malankar/Linkshr

Spotify Redesign

Redesigning and creating a minimal Spotify app that shows you your recently played songs, has an inbuilt player to play songs and offers fast search functionality. The UI is very eye-catching and easy to use.

Stack: NextJs, Spotify's Web API, NextAuth, Recoil, Tailwindcss
